PROFILE

I am an enthusiastic youngster to do UX/UI design with expertise in Figma for creating visually appealing and user-friendly websites. Additionally, I specialize in game design using Unity and 3D modeling with Blender. My skills range from crafting intricate website layouts to developing engaging games and creating detailed UX/UI models. With a background in these diverse design tools, I aim to bring creativity and innovation to every project I undertake.

PROJECT

SIH

Job seeking app

Engaged in a collaborative team project for the development of a job-seeking app under the Smart India Hackathon (SIH). Involved in the conceptualization, design, and production of digital magazines using InDesign, Adobe Digital Publishing Suite, and HTML.

Tourist app

Include 3d model

Led a dynamic team project focused on refining the AR/VR technology stack. Collaborated on complex 3D projects, enabling real-time teamwork for creating, simulating, and rendering photorealistic environments.
